Gen. Banks' Expedition

COUTTON OF CHE TROOPS

[From the New York World, Dec. 4] a believed in military and naval of ien. Bank's flost of transports wi that Gen. Bank's flowt of transports will sall to-day or to-morrow.

It has been generally known for some time that one of the most formidable expeditions sent from New York since the war began, has been in course of organization here for some weeks. Troops and twop ships, supply vessels, transports, and esteambooks of every description, have been moving incessently. Not a day has passed for weaks without being signalized by the advent of some fresh addition to the first and corps of armes. Speculations has been rife as to the destination of this vasi concourse of men and ships. A Philadelphia journal, the same which prematurely amounced the capture of Harper's Ferry by Barnside, did not breitate to say some weeks since that Gen. Banks was bound to Texas. The appointment of Col. Hamilton on his personal staff assemes to give a color of train to this theory, which may be facilitious. Other journals have prephension of Risingand, which it is to reach by queer routes, and Charinaton's appeal downlil is the work editi others assign to it.

Decisions of the Tax Commissioners.

The Commissioner of Internal Revenue has made the following decisions: Railroad companies making ears and lecomotives to replace old stock or to increase their equipments must pay a tax upon the whole value of such manufactures if their annual products succed \$600, even though the articles are manufactured for their own use. Carpets when prepared by dealers in carpeting and upon special pared by dealers in carpeting and upon special orders are not regarded as manufactures, nor liable to taxation as such. Salis, when made upon order and to suit a particular vessel, are not regarded as manufactures within the mean-ing of the Excise law, and they are conse-quently exempt from duty. The tax on dia-monds and emeralds when previously cut and prepared for setting will be assessed only on the value of the setting.

The Great Eastern in a Bad Way.
A correspondent of the New York Heroid,
who visited the Great Eastern a few days
since, Bays she is lying aground about half a
mile south of Fort Schuyler, and just off
Whiteside Point, Long Island. She is
greatly hurched and badly houred, that is, sweating blood. They cannot, at such a time, be heard to utter angry accusations against the authority which, in their personal inconvenience, meant only the public good.

Leaving the consideration of the nature of the authority of a military commander in time of war, and within the sphere of military operations, and which, under the limitations stated, the Constitution confers on the President, as Commander-in-Chief of the armies of the United States, let us inquire what may be properly regarded as "the sphere of military operations," whose limits constitute the geographical boundaries of military power? Is it confined to Draft'in Jowas.

Billie South of For Schuyer, and just the first schuyer and be the greatly lurched and badly hogged, that is, her frame has been so fearfully strained that the ritre line, from stem to stern, presents the bow-like curvature described by a hog's back. It will be remembered that in her last vorage, the English pilot whom she had aboard refused the aid of his New York brethen, and, in consequence, ran the huge vessel sahere, starting a hole in her on her port side near the bottom, and knocking a portion of her serew into fragments. Her eargo has since been discharged, and repairs have been commenced, but their success is doubtful. In her present condition the

ries of military power? Is it confined to
the battlefield; to the line of an army's
march; to the precincts of the camp; or
can you establish at any fixed distance
from either of these points or lines of departure the "no further" of military authority?

It is therefore with mingled pride and pleasure that I refer you to our history as a society, to the good results in the various departments, to the perfect harmony of feeling which has prevailed in all our discussions, the difference which each has paid to the other's opinion, how much severe they may have differed in opinion from his own, in short the good with which each has been greeted and the uniform good fellowship which has charecterized all our intercourse, whether in publie or private.

In recalling our past history, we see much to to stimulate and to encourage, for the future. From a little handful of zesious men, who aix years ago met in Docatar, when the Society had its birth, its numbers have constantly in-creased until they are now counted by hun-dreds, and our influence is being for good, in

The President referred to the fact that while our fruits appeared and were really becoming better in quality, yet the trees appeared to lose vigor, and he would eait the attention of members to the propriety of daing something in this direction to consumerate the latter; that we should go back to first principles, and thus fortify the weak points.

Dr. Warder discussed the latter potent at length, and freely concurred in the necessity of paying more attention to the hardiness of the tree; to good and continuous crops, rather than a few specimens of superior, rather than a few specimens of superior, and its recommended that recent whites, and its recommended that recent whites, and its recommended to enable the superior of the proposed of the superior of the proposed to the visit of the present of the enconcentration of the en The President referred to the fact that while GILMAN, SON & CO., to. 47 Exchange Flace, New York.

That our truits, in departing from the original type, become better in quality, white the tree was less hardy, was well established fact. We must tarn our attention in that direction, and, if possible, increase the hardiness of the tree, without at the same time materially diminishing its quality. In the departure from the original condition, we both lose and gala—gain in richness of fruit, and lose in the hardy qualities of the tree.

Mr. Coleman stated that Mr. J. A Pettingtil of amountpin county has for several goars been in the practice, when his trees were first attacked with the blight, to shave off the outer bark of the trunk or branch siffered below the affected part with a drawing kaife or spoke shaver, and that in every instance the progress of the disease had been arrested. Mr. C. had tried the remarky of averal occasions, and also named half a dozen other gestleman who had done so, and thus far the remedy was so, and thus far the remedy was treating at once. Unless defeated, thereseems little prospect now that the enemy will abundon their present position.

The recent capture of two squadrons of the 3d Passayivania cavalry is most severally censured on all hands. Companies C, G, L, and M, Capts. Johnson and Huss, Lieuts. Warren, Hill and Englobert, were taken by the rebols, only twenty of the men escaping. Only a culpable neglect of proper picketing sould have produced this unfortunate occurrence, seven miles from Falmouth, at Hartwood church.

Immediately following this announcement comes a report that three hundred infantry were captured at a ford up the river, but a few miles away. Whether this will be confirmed or not I have some doubt. After recommending that the various tribes of Indians be placed on recervations, to be followed up by teaching them the arts of peace and civilization, with the purpose of utilizated dividing the lands among them, the Commissioner proceeds to state the condition of the tribes in the various Territories. With the Indians of Decotah—the Pancas, Grosventers, Mandous, Aricaves, Assimobolus, Blackfeet, Crows and Sioux—Our relations are all friendly, ears with the Sioux Territorial treaties have been made only with a few of the tribes, and the Commissioner recommends that stops be at once taken to locate the Indians upon recervations. He expresses great fears of sitacks from the Stoux of Dacotah, who anmber 13,000, in the spring—they having aiready commenced hostilities against some of the smaller tritox. All parties in the Territory agree as to the danger of an outbreek.

The Commissioner gives a sketch of the intrigues of the rebel leaders with the Southurn Indians, by which large numbers of Indians west of Arkansas had oven drawn into a support of the rebellion; he almost sain to the unfineding loyalty of some Seminoles, Creeks and others, who fought for the Union with success until overborne by largely superior numbers of rebel troops from Texas. By reason of title, from 0,000 to 3,000 loyal Indians had been driven from their homes and were then in a state of great destination on the southern borders of Kansas, where for a time they were ted by Gen. Hunter until the middle of January last, when the government had jarnished provisions. In another expedition since, 5,000 of the Indian had par-leipsted, and had reven themselves splendid soldiers. The Commissioner asks a generous appropriation for the loyal Indians now in kanse.

miling a public sale on Thursday, December
11th, at 10 o'clock, at the store, No. 54 Dearborn street. The sale will be confuncted personally by Mr. Wad A. Butters, and suftable
wrangements have been made for the accommodation of ladies. In the assortment is a
copy of the figure known as "Denaide," together's th many claborate articles which will,
no doubt, upon examination, elicit general
approbation. The stock will be ready for inspection on Wednesday, the day before the sale.

Oun Two Charteners.—In the roply of
the Rosskill Cametery Company to the strictures of the Tanguay on the management of
that corposation, in its relations to the public,
nearmons are given that some action shall be
specifly had by which the perpetual maintahance of the Cametery grounds will be scured by the manual income of a fund invested
for that purpose. On Thursday, July 28th,
1859, Roschill was dedicated; and in a address by Dr. J. V. Z. Blaney, on that occasion,
he, in the name of the Directors, after saying
that the creation of a fund for mulantenance,
had engaged the attention of the management,
and that a committee for that purpose, consisting of Dr. C. V. Dyer, C. G. Hammond
and Jonathan Burr, had been appointed, made
this pleedge:

OUR TWO CEMNTERIES.

GENTLEMEN: In your issue of this morning Inotice as "appeal to the proprietors" of "our two cemeteries" to "say what they will do" in relation to certain charges made by you concerning them. While we do not desy the propriety of your suggestions, you will permit us to say that, had you carried your examination a fittle further, you would combtless have given us much more credit for attention to the wants of the public than you have done.

In the Press and Pribune of July 29, 1839, you will find in the address of Prof. J. V. Z. Blancy, then President of our Company, a full

In the Press and Tribune of July 29, 1898, you will find in the address of Prof. J. V. Z. Blaney, then President of our Company, a full discussion of the propriety of setting apart a fund for the perpetual measurement of the company that ten per cent. of all receipts from the sale of burisl lots should be appropriated for that purpose, as soon as a proper plan could be devised for the investment of the same. You will notice further that the determination of the mode of investment was referred by the Board of Consultation of the centered by the Board of Consultation of the centered by the Board of Consultation of the centery—a body consisting of several of the best chizens of Chicago—to Dr. Charles V. Dyer, C. G. Hammond, Esq., and Jonathan Burr, Esq. The Board of Consultation was appointed for the purpose of representing and grarding the interests of the public in the centery, and all of its members accepted the trust, none having at the time any personal interest in the centery. We have last frequent conversations with this committee upon the subject of such as fund, but they have never been able to furnish a plan satisfactory to thermselves. As soon as they thall do so, the company stands ready, as they have

do so, and company sames reasy, and always door, to redoce their pledge in the fullest manner.

It is obviously a matter of no little moment to decide upon the proper plan for managing a public rund, which is designed to be perpetual. Trustees are not the most reliable of bodies, as the frequent desheations and swindles of public officers of all kinds sufficiently attest.

We repeat, then, that we only await action upon the part of the public to carry out the design to which we were piedged at the opening of our Cennetery. We also propose that all funds for the improvement of private lots shall be invested in like manner with that above mentioned.

You will perhaps allow us further to suggest that all tears of the speedy sale of the entire centerey are groundless, as the Rosenhill Company alone owns 280 erres, which the experience of older cemeteries and larger cities shows to be simple for many generations to

company access when seeked, when the experience of older comesters and larger cities shows to be ample for many generations to come.

Your statement that the entire proceeds of Greenwood, Mt. Anbura and Laurel Hill go to the improvement of the grounds, is not correct as to the last named cemetery. Greenwood was also originally organized upon the assemplas as Mosehill, but afterwards taken in charge by the public.

It may not be know to many that when the agitation of the project for a new cemetery, which resulted in the organization of Roopensed was commented, our corporation of Roopensed was commented, our corporation, whose success would depend entirely upon the liberality and good laste displayed by it.

We are still ready to conform, in this respect, also to the public wish, and, if desired, will transfer our franchies, grounds, &c., to the city or a board of trustees, subject to such restrictions as will insure the improvements and maintenance of a first-cluss rural cemetery—asking is return for a rembursement entry—asking is return for a rembursement and was also and improvements thus far.

We have the pleasure of knowing that as yet there have been no complaints as to the system of management adopted by us, nor of any lack of attention to the wants of the public far or enterprise—maintaken as it was at their own request—and always pleased to set upon any suggestion connected therewish, we ask for our statement equal publicity with that made by you this morning.

By order of the President and Board of Managers of Rosehill Cemetery.

J. Woonenton Barra.
